For example, information on the population, socio-economic and demographic data. This can include data sources, social perceptions and public discussion.

4.1.17 - Overall objective (impact evaluation). What is the main purpose of the intervention? How will it modify or change the stated problem? *

Please specify the specific objectives which should always relate to changes in the target groups. The specific objectives do not necessarily have to relate to drug use but each of them, if achieved, should lead plausibly to fulfilment of the general objective.

4.1.19 - Specific objective 2 (outcome evaluation)

4.1.20 - Specific objective 3 (outcome evaluation)

4.1.21 - Operational objectives (process evaluation). The operational objectives are the outputs or products of the intervention, for instance training sessions held, manuals published and distributed, teachers trained, schools involved, peers recruited, but also the demands for repetition of the intervention and the degree of acceptance. These are technical, intermediate aims in order to achieve the changes in the target group you have previously defined as specific objectives.

4.1.22 - Basic assumptions/theory Is there an explicit theory explaining your intervention and predicting its expected results running through your programme? If so can you identify and describe this theory? This

theory will need to have a basis in the scientific literature such as medical, psychological, sociological etc. Alternatively: Is your intervention based on an implicit set of assumptions regarding how your intervention will work and what results it may provide? If so can you identify and describe these assumptions? Such assumptions may be developed through community learning or other grounded theory approaches.
